PERSONAL PROJECTS

IoT Smart Garbage Monitoring System (01/2022 - 04/2022)

- This project Garbage Monitoring system is a very innovative system which will help to keep the campus clean. This system monitors the garbage bins and informs about the level of garbage collected in the garbage bins on website
- Website is built, to show the status to the user monitoring it. The web page gives a graphical view of the garbage bins and percentage of level of bin. When garbage level reachs the threshold level, server sends SMS to respective authority.
